Subject: RE: questions form our Risk Assessment Division

Hi Virginia,

I will see about getting a meeting with Geary this week and get some documentation together quickly. Thanks !

Jeff

Subject: questions form our Risk Assessment Division

Hi Jeff.

Could 3M address the following questions that EPA's Risk Assessment Division have?

"Could you ask 3M to provide justification/support for the following statements:

1. C8 Perfluoro manufacturers in Asia use an older process (ECF) to make C8 polymers which results in large amounts of C4 being present as an impurity; which may explain the high serum values in Taiwan and elsewhere. Can you provide quantitative information to support this (i.e., pounds C8 produced/C4 present)?
2. How much C4 does 3M currently make/import into the US?
3. Does 3M have any worker biomonitoring data on C4?"
